HTML5 & .NET Application Development

Case Overview

Weston Solutions is a premier provider of environmental and infrastructure support services serving federal, state and local government, industrial, utility and commercial clients. Weston engaged Oakwood to help them begin an upgrade for a series of critical legacy applications.

Business Challenges

Defining a development approach which would allow for a consistent pattern across pages of the application. Upgrading and implementing a similar third-party library with the same capabilities to replace their older version. As well as refactoring code where necessary without affecting the current functionality.

- Aging technology
- Lack of efficiency

Solution

The Oakwood team reviewed the application and ultimately decided updating the application to use .NET master pages would be the best solution. Allowing pages to maintain a site wide consistent look and feel, the capability to centralize the common functionality of pages for updates in just one place and upgrade to be html5 compliant.

Going forward future changes will be quick and easy to implement. Time saved on development because layout and most common features can be handled from a single

source.

- Modernized application to leverage newer technologies

Another successful engagement with total scope of project delivered on time and on budget!

Next Steps

Let us tackle your biggest challenges. Reach out to Oakwood and let's discuss your business objectives and technology needs. Please review a few of our business success case studies here.

About Oakwood

Since 1981, Oakwood has been helping companies of all sizes, across all industries, solve their business problems. We bring world-class consultants to architect, design and deploy technology solutions to move your company forward.   Our proven approach guarantees better business outcomes. With flexible engagement options, your project is delivered on-time and on budget. 11,000 satisfied clients can't be wrong. Let's have a discussion to learn more about your business needs and goals.
