

AGILE TRANSFORMATION CHEAT SHEET

Transform your organization by focusing on agility.

AGILE PRINCIPLE #1

Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.

AGILE PRINCIPLE #2

We welcome changing requirements, even late in development. Agile processes harness change to the benefit of our customers.

AGILE PRINCIPLE #3

Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.

AGILE PRINCIPLE #4

Business people and developers must work together daily throughout the project.

AGILE PRINCIPLE #5

Build projects around motivated individuals. Give them the environment, tools, and support they need to get the job done.

AGILE PRINCIPLE #6

The most efficient and effective method of conveying information is a face-to-face conversation.

AGILE PRINCIPLE #7

Working software is the primary measure of progress.

AGILE PRINCIPLE #8

Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.

AGILE PRINCIPLE #9

Continuous attention to technical excellence and good design enhances agility.

AGILE PRINCIPLE #10

Simplicity - the art of maximizing the amount of work *not* done - is essential.

AGILE PRINCIPLE #11

The best architectures, requirements, and designs emerge from self-organizing teams.

AGILE PRINCIPLE #12

At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly.

WE ARE UNCOVERING BETTER WAYS OF DEVELOPING SOFTWARE BY DOING IT AND HELPING OTHERS DO IT. THROUGH THIS WORK WE HAVE COME TO VALUE:

Individuals & Interactions **over** Processes & Tools
Working Software **over** Comprehensive Documentation
Customer Collaboration **over** Contract Negotiation
Responding to Change **over** Following a Plan
